Tanya *Arora*

Engineer by training, **creative by nature**. *Currently trying 50 new careers to find the one that was always mine.*

For **six years** I shipped high-value products at **Microsoft** and **Uber**. The kind of work that pays well, looks great on a résumé, and quietly puts a lid on the part of you that wants to make something new.

In January I walked away. Started a rule: try a new career every two weeks until something clicks. Four months in, I'm at seven: florist, muralist, exhibition designer, event marketer, telemarketer, community host, live-commerce host. Somewhere in the middle of them, the fog lifted.

Now I know exactly what I want. To bring everything I've collected, an engineer's discipline, a maker's taste, and the hustle it takes to pull off seven careers in four months, to a team that's building something real.

EXPERIENCE

Maker · 50 Creative Careers
Jan 2026 — Present

- Quit a senior engineering role with no plan beyond one rule: try a new career every couple of weeks until something clicks.
- Seven careers completed in four months. Each one built from scratch: vendor sourcing, playbooks, financials, pitch, delivery, on-camera execution.
- ~180k cumulative reach across Instagram reels documenting the project.

Software Engineer · Uber
2023 — 2025

- Built data pipelines for internal developer teams. Customers were my coworkers. the fastest feedback loop I've ever had.
- Owned data quality + SLAs across multiple production workloads, from ingestion to alerting.
- Learned what "shipped" actually means when the people downstream sit three desks away.

Software Engineer · Microsoft
2019 — 2023

- Part of the product activation team — the 16-digit keys that turn on every copy of Office, Windows, and Visual Studio.
- Invisible infrastructure at planet scale. You only hear about it when it breaks.
- Four years of shipping under real accountability. That muscle is the foundation for everything since.

EDUCATION

B.Tech, Computer Science
2016 — 2020

Lovely Professional University. Placed at Microsoft with a **₹45 LPA** offer, the highest my college had ever seen. The only one of its kind. That's the pattern that's followed me since: drop me into a room I don't belong in, I'll figure out how to earn my place.

SEVEN CAREERS, FOUR MONTHS

01 **Florist**
Sourced wholesale, sold at weekend markets. Broke even on day 8.

02 **Exhibition Designer**
Turned a SaaS startup's product vision into physical artifacts clients could touch.

03 **Event Marketer**
Helped a food chain break into wedding catering. Built the pitch process and prospect outreach from scratch.

04 **Community Host**
Co-hosted a Bangalore weekly club. 20 strangers walked in. I was the one who made them friends.

05 **Mural Artist**
Traded a heritage mural in Jaisalmer for 10 days of free stay. Finished on deadline.

06 **Telemarketer**
Live on Flipkart most days. Selling products, managing chat, watching live commerce up close.

07 **Live-Commerce Host**
On-camera for ~2 hours a day. Learned the script, the cadence, the math.

WHAT I'M LOOKING FOR

- ✓ Founder's Office · Chief of Staff
- ✓ Creative Strategy · Brand & Marketing
- ✓ Creative Operations · 0→1 product roles

Bengaluru-based or remote-friendly. Teams building in consumer, D2C, food, or creator economy.

SKILLS / TOOLS

Writing · **Brand voice** · **Storytelling** · **0→1 thinking** · **Python** · **SQL** · **Data pipelines** · **Creative direction** · **Event production** · **Live commerce** · **Selling** · **Community building**
